ALUMINUM PERGOLA

Louvered roof pergola is a latest type of shading pavilion ,It has excellent sunshade, heat insulation, rainproof, wind-resistant, stable and durable functions.

1.Extra large opening and closing flip angle of blades

The Extra Large opening and closing blades have a flip angle of up to 90 degrees, allowing you to adjust the shading and wind intake according to your needs.

2. Double Layer Blades with outlet sink

The top blade of the louver is equipped with a outlet sink, and rainwater flows from the blade outlet sink to the inner outlet sink. Even if it is opened after a heavy rain, it will not leakage.

3. The dual drainage system

The dual drainage system effectively prevents surrounding rainwater is splashed. The top surface can withstand rainfall of 40-50 ml per second per square meter for 2 minutes.

4. Flat load capacity 100KG

The Posts and cross beams are enlarged and thickened, the blades are widened and thickened, In order to ensure that every user can use our products with peace of mind, we use high-quality materials to make each product. making the products more stable and durable.The anti-snow pressure can reach 100KG per square meter.

5.Cross Beam LED light system

The louvers and cross beams of pergola are installed with LED lighting strips. it control by a remote control . The light strips are designed with waterproof silicone seals. High-brightness, no flicker LED light,energy-saving and efficient, warm light/white light options.

6. High density powder spraying

The outer surface is made of polycrystalline diamond composite (PDC), plastic, and resin mixed with high-density powder spraying to make the material surface rust-free and maintenance-free. The space environment is safe and formaldehyde-free. It is acid and alkali resistant and 20 years is not faded.

Awnings can also be high-end

As a new generation of telescopic awning products, the full-box awning is much more advanced than the traditional telescopic awning in terms of shape design, scientific and technological intelligence and durability.

Using one full box design, the cloth and the curved arm can be completely collected into the box, which not only can play a protective role, but also makes the whole product look more tidy and beautiful. Beautiful lines and the architecture of the tough set off each other, integrated, full of beauty.

The appearance of the full-box awning makes the application of high-end outdoor space more abundant. The modeling is brief, the installation occupies less area, and provides shading and rain services for outdoor space without affecting the original landscape structure, creating a more comfortable and advanced leisure space.

>>> CLASSICAL TYPE

FRONT AND BACK ARMS WITH LED STRIPS/AUTOMATIC/ INTEGRATED SEAL/HIGH-END AWNING

With the improvement of people's quality of life, the increasing emphasis on outdoor space has led to the emergence of beautiful, lightweight, durable, and intelligent full-box awnings.

Compared with the heavy-duty full box, the classic model has the same structure, is lighter in weight, and the maximum size of a single set is small, with a maximum width of 6 meters and an extension of 3 meters; more importantly, the classic full box adds front and rear curved arm light strips and box light strips, which greatly improves the night lighting ability.

The listing of the classic full box is very popular in the market, suitable for: apartment terraces, villa shading, clubs, B & Bs, hotels and other spaces. It is the best choice for shading and building leisure spaces in high-end places today.

PVC PERGOLA ROOF

The special fabric connects to the cross bar, driven by a motor that moves a pulley along an aluminum alloy track, enabling the opening and closing of the canopy. This allows users to freely enjoy outdoor space while providing sunshade and rain protection, replacing traditional fixed canopies and sun rooms, and redefining outdoor space solutions.

Parameters:

- Color:** Dark gray, white, coffee color, special colors can be customized
- Material:** Aluminum alloy 6063
- Size:** Standard size of 5x7 meters; can be customized to a maximum extension size of 11 meters
- Surface Treatment:** High-density powder coating for enhanced rust and corrosion resistance
- Motor:** imported/domestic optional, two-year warranty
- Horizontal bar spacing:** 450mm-500mm
- Lamp Strip:** Waterproof silicone with 3000K brightness LED
- Rain Resistance:** Fully waterproof design
- Wind Resistance:** Capable of withstanding wind speeds up to 62 km/h (Level 7)
- Fabric:** Heavy duty diamond patterned flame-retardant fabric, imported/domestic

Fabric Introduction:

- Fabric material:** PVC+polyester
- Tensile strength:** radial 3312N/5cm, latitudinal 2898N/5cm
- Fabric thickness:** 0.68mm
- Lifespan:** Normal use with a warranty of up to ten years
- Fire rating:** GB/T5455-2014
- Weight:** 850 g/m²
- Colorfastness:** UV resistance level 4
