To be the industry's best cost-effective solution provider with leading technology

- China Patent Excellence Award in 2021
- Guangdong Provincial Government Quality Award
- Guangdong High-tech Enterprise
- Awarded Forbes Asia' s Best Under A Billion in 2018
- The first batch of Guangdong enterprises to be granted the title of "National Hi-tech Corporation" .
- Leading Enterprise of Foshan National High-tech Zone in 2020
- Top 2 on Competitive Enterprises List of China Plastics Injection Molding Machinery Industry in 2021
- Advanced Enterprise in Science and Technology Innovation in 2019
- Guangdong Top 500 Enterprises in 2019
- Key Enterprise of Strategic Emerging Industry in Guangdong Province in 2018 (Intelligent Manufacturing)
- Chinese Most Innovative Companies Top 50 in 2016
- National Postdoctoral R&D Center and Academician Workstation were established

PART 1

Overall Strength

1 / Strategic Goal

2 / Global Operation

3 / Development Potential

4 / Rapid Development

Strategic Goal

Aim

We are dedicated to enabling Chinese equipment manufacturing technology to keep pace with the top firms in the world, creating better user experience and investment return for customers worldwide

Mission

We are determined to become a world-class enterprise in the industry

Vision

We wish to become a long-lasting enterprise with effective operations, efficient management and excellent culture, of which the employees are proud and to which social respect is showed

Global Operation

600000m²

600000m² of total world-wide manufacturing floor space

6

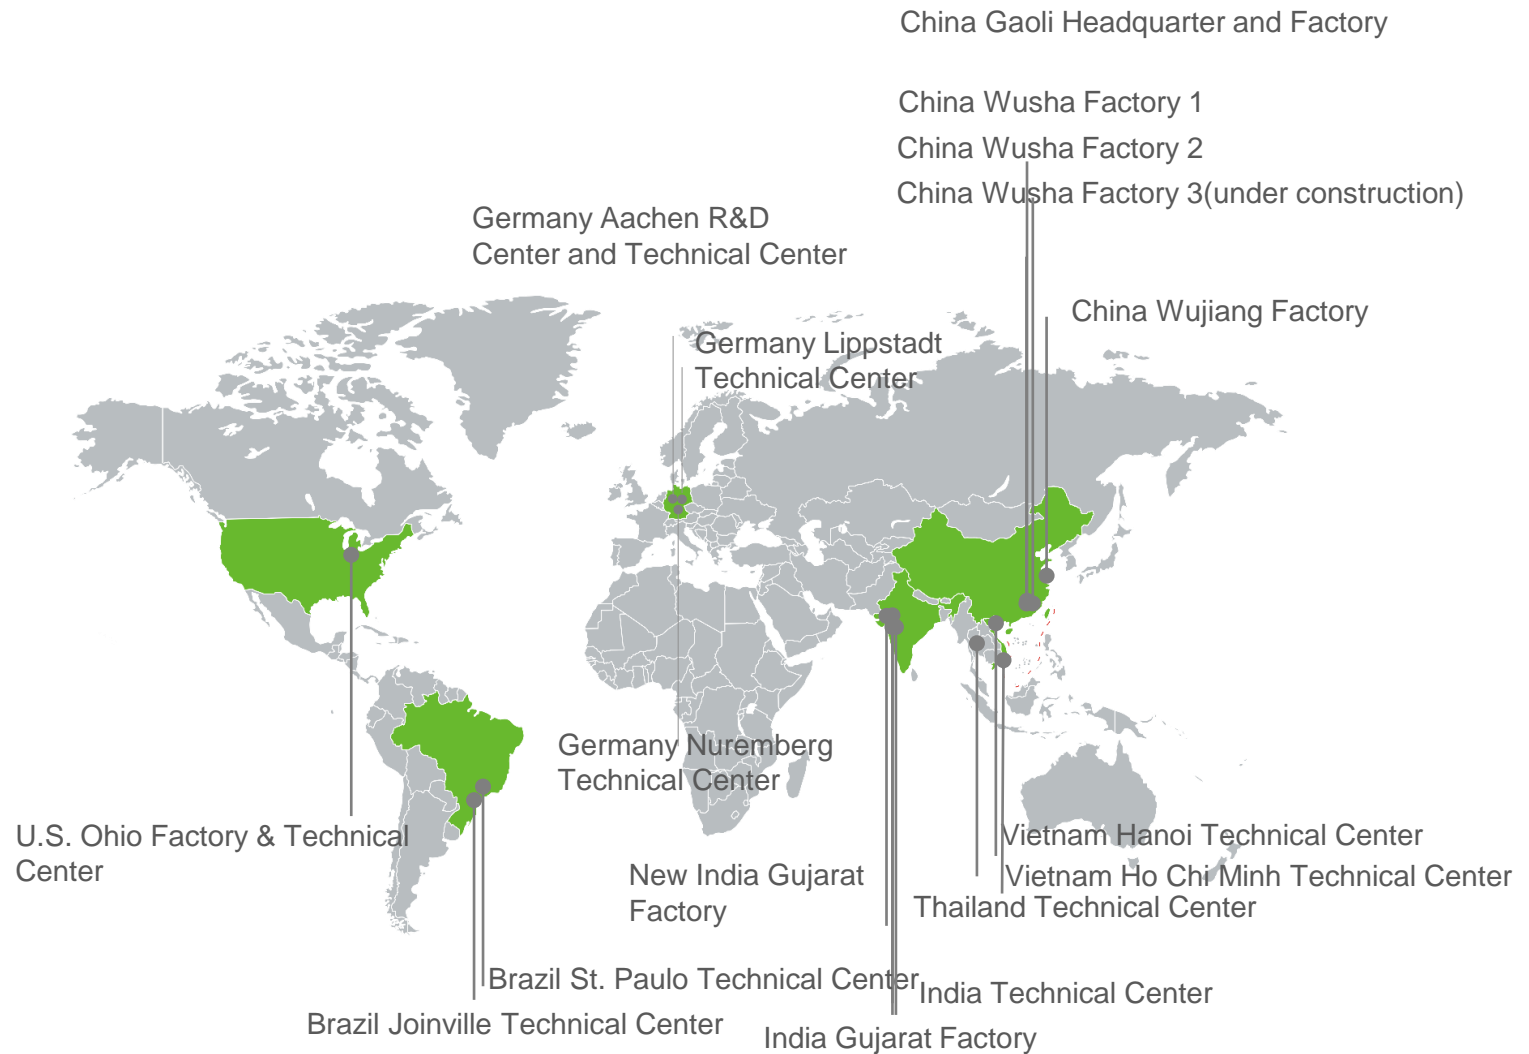

Established six overseas subsidiaries in Germany, the United States, India, Vietnam, Brazil and Thailand.

70+

Owens over 40 global sales and service representatives, business covers over 70 countries and regions

3000+

Over 3,000 employees globally

Global Operation

China Gaoli Headquarter and Factory

Factory in Gaoli, Shunde, occupies an area of 80,000 m²

Main Projects:
Die Casting machines, Thixomolding machines and in-house manufacturing of key components

China Wusha Factory 1

Factory in Wusha, Shunde, occupies an area of 81,000 m²

Main Projects:
Injection molding machine production

China Wusha Factory 2

Factory in Wusha, Shunde occupies an area of nearly 92,000 m²

Main Projects:
Producing all-electric machines, high speed packaging systems, rubber machines and molding technology

China Wusha Factory 3

Factory in Wusha, Shunde occupies an area of nearly 178,000 m²

Main Projects:
Smart manufacturing solutions, environmental project development and Industry incubation for molding solutions

China Wujiang Factory

Factory in Wujiang, Suzhou occupies an area of 33,000 m²

Main Projects:
Producing two-platen injection molding machines, robotic automation systems and additive manufacturing technologies, etc.

Global Operation

U.S. Ohio Factory & Technical Center

Ohio, United States
occupies an area of 28,327m²
Main Projects: Sales & Customer Services incl. spare parts, HPM products manufacturing, technology display, equipment training

India Gujarat Factory

Ahmedabad, India
occupies an area of 8,775m²
Main Projects: Production and sales of injection molding machines

New India Gujarat Factory

Gujarat, India
occupies an area of 81,000 m²
Main Projects: Intelligent equipment and injection molding machine production

Germany Aachen R&D Technical Center

Alsdorf, Germany
Main Projects: Additive manufacturing, special application of polymer processing and R&D of other application processes, sales and technical services of die casting machine, Thixomolding, rubber injection machine, SpaceA 3D printing, etc.

Germany Nuremberg Technical Center

Nuremberg, Germany
Main Projects : Sales and technical service of injection molding machine and its auxiliary automatic equipment

Vietnam Technical Center

Bac Ninh, Vietnam
Main Projects : Sales and technical service of injection molding machines and its auxiliary automatic equipment

Brazil Technical Center

Joinville, Santa Catarina
Main Projects: Providing sales and technical services of injection molding machine and automatic peripheral equipment

India Technical Center

Pune, India
Main Projects : Providing sales and technical services of die casting machine and automatic peripheral equipment

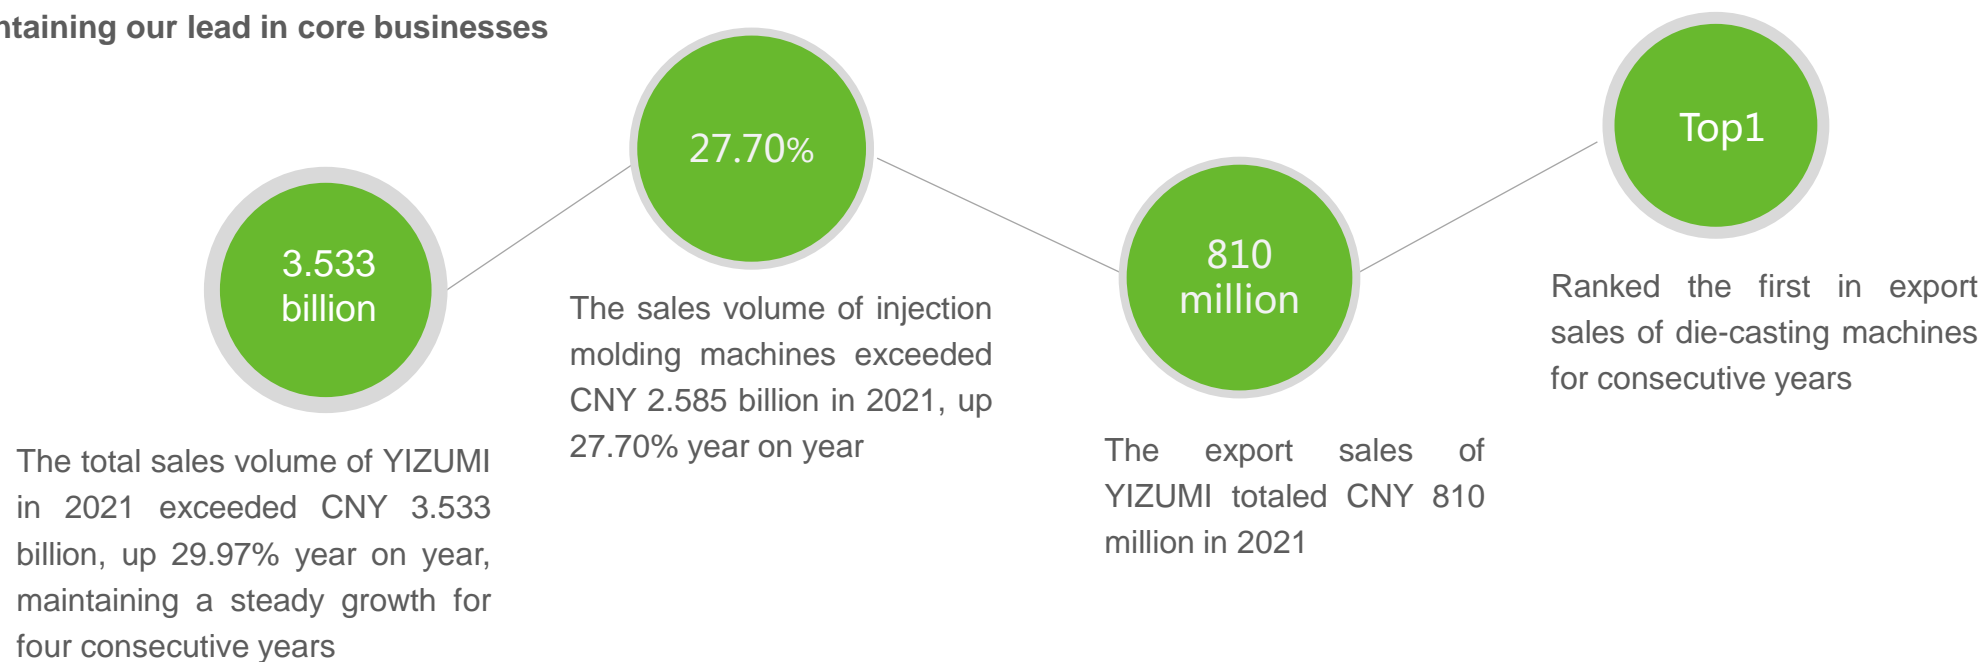

Germany Lippstadt Technical Center

Lippstadt, Germany
Main Projects : Sales and technical service of injection molding machine and its auxiliary automatic equipment

Development Potential

- Continuous steady growth in all business divisions
- Steady growth in overseas markets
- Attractive potential in all business divisions
- Maintaining our lead in core businesses

Rapid Development

YIZUMI Precision Machinery Co.,Ltd. was founded

2002

Rubber Injection Machine Division was established

2009

High-speed Packaging System Division was established

2011

Factories in Wujiang, China put into operation

2013

Die Casting Machine Division was established

2004

YIZUMI acquired HPM Company and established Technical Center in North America

Robotic Automation System Division was established

2014

Rapid Development

Went public successfully.
YIZUMI became China's first
molding equipment
manufacturer listed on ChiNext

2015

U.S. Ohio Factory went
into operation

Held the first advantaged
molding technology
connect meeting

2017

YIZUMI Vietnam
Company was founded

YIZUMI broke ground
on its Global
Innovation Center

2019

New Indian Gujarat
Factory started
construction

YIZUMI intelligent
factory started
construction

2021

2016

YIZUMI India Gujarat
Factory was founded

Germany Aachen R&D
Center and Technical
Center was set up

Won Guangdong Provincial
Government Quality Award

2018

Awarded Forbes Asia's
Best Under A Billion

2020

YIZUMI Germany
and YIZUMI Brazil
were established

The project of YIZUMI Wusha
high-end intelligent equipment
industrial park was launched

PART 2

Connect Advanced Molding & Casting Technology Between China and Europe

1 / International Talents

2 / Global Innovation Platform

3 / Global Cooperation

International Talents

155

R&D investment in 2021 reached nearly CNY 155 million, up 21.49% year on year

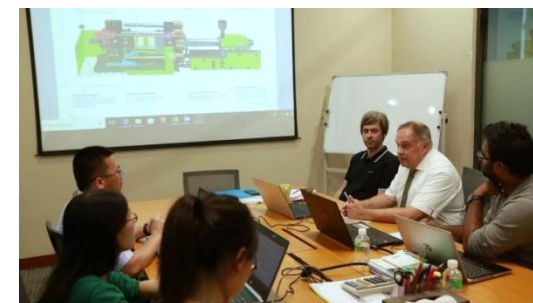

700+

Organize overseas research and development teams with over 700 technical specialists

250+

Obtained more than 250 patents

*As of April 2022

International Talents

Dr.-Ing. Hans Wobbe

YIZUMI Chief Strategy Officer

Dr. Wobbe has more than 40 years of experience in plastics machinery industry. He was CTO of Austria ENGEL and Technical Director of Germany Krauss Maffei.

Now He is responsible for YIZUMI's global strategy and product development, strongly driving innovation.

Stefan Fritsche

YIZUMI Die casting & Metal forming Chief Strategy Officer

As an expert of European die-casting industry with 35 years of experience, Stefan Fritsche held a variety of management positions in the die casting industry in Europe, Asia and North America. His experience includes positions in leading companies such as Schaufler Tooling (Managing Director), DGS Druckguss Systeme AG and Georg Fischer (Business Development & Operations Management) as well as Buhler AG (Sales and Market Management)

Now He is in charge of global operation and product development of YIZUMI's die casting division.

Global Innovation Platform

YIZUMI Global Innovation Center

The center has been put into use by the end of 2021. The innovation center offers an ideal platform to cooperate with global technology leaders, institutions and universities.

New, innovative technologies will be turned into cost effective and sustainable applications and solutions for our customers world-wide.

R&D Multi-
functional

Lecture
Hall

New Materials
and Processes
Test Center

Global Innovation Platform

YIZUMI Germany Aachen R&D Center and Technical Center

Located in Alsdorf near Aachen, YIZUMI Germany is focusing on additive manufacturing, special applications of polymer processing, Thixomolding technology as well as other lightweight and multi-material application technologies, etc.

The proximity to RWTH Aachen allows to maintain the excellent relationship built up over the past years.

The Campus of RWTH Aachen University

YIZUMI Germany Aachen R&D Center and Technical Center

Global Innovation Platform

Product and Process Application Center (die casting and metal molding)

YIZUMI invested more than CNY 10 million in establishing product and process application center. It can offer a great platform for customer casting trials, small series productions, die sampling as well as die casting process development and die casting process training.

Being intimately familiar with all aspects of the die casting process enables YIZUMI to utilize its know how to develop and establish highly productive die casting solutions for our customers and provide training on a high level for the benefit of the die casting industry.

Innovation

Display

Global Cooperation

YIZUMI strives to connect global technology leaders and organizations with the goal of harnessing innovative know how to innovate and provide the best cost-effective solutions to our world-wide customers.

Prof. Dr. Christian Hopmann, the president of IKV, Plastics research institute, RWTH Aachen university, in technical exchange activities

PART 3

Integrated Solutions

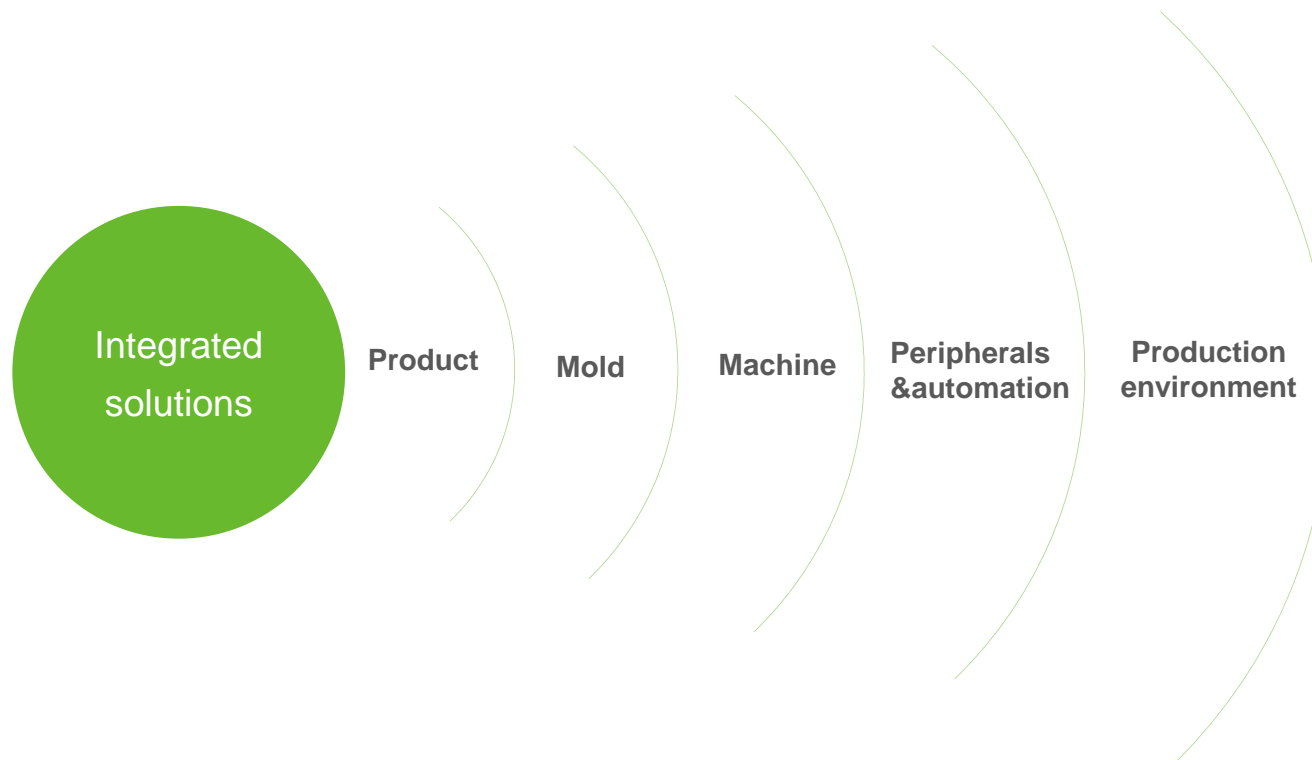

1 / Polymer Molding, Casting and Metal Forming Solutions

2 / New Tech Customized Solutions

3 / Intelligent Manufacturing Solutions

Integrated Solutions

Integrated Solutions

Injection molding application solutions

Product Lines

11 product lines, including two-platen injection molding machines, all-electric injection molding machines, multi-component injection molding machines, high-end general-purpose injection molding machines and several special-purpose injection molding machines

Application

Automotive, household appliances, 3C electronics, packaging, medical treatment, daily necessities, etc.

Key statistics

TOP 2

Top 2 comprehensive strength enterprises of China Plastics Machinery Industry

70,000

More than 70,000 injection molding machines in operation globally

100+

Product ranges up to 31, more than 124 technology patents

Integrated Solutions

High-speed packaging system application solutions

Product Lines

Products include PAC series hydraulic high speed machine, hybrid and full electric high speed machine, high-speed PET preform injection molding system, injection molds for packaging.

Application

Food packaging, beverage packaging, medical consumables

Key statistics

Leading

One of the leading companies in the field of high-speed injection molding

Innovation

Rated as a Technologically Advanced Small Enterprises and obtained a number of technical patents

2.1S

PacPro solution shortens the production cycle with 2.1s

Integrated Solutions

Rubber injection molding solutions

Product Lines

7 product lines, including Asian standard line, European standard line, energy industry line, C-frame lines, horizontal lines, compression lines, customized solutions

Application

Automotive, energy industry, electronic industry, railway transportation, medical care, household appliances

Key statistics

TOP 2

Top two in Chinese rubber injection molding machine market

Draft two national standards in rubber injection molding industry

Grasp the key technology of the special-purpose machines in the energy industry and reach the world-leading level

Additive Manufacturing

SpaceA Additive Manufacturing System Solutions

Product Model

SpaceA 900
SpaceA 900E
SpaceA 1100
SpaceA 2000
SpaceA 2000-Hybrid

Application

Automotive, E-mobility, sporting goods, household appliances, furniture

Key statistics

Won the 2019 European SPE automotive innovation award

The first application solution was adopted by the German space agency (Arena Project)

Integrated Solutions

Die casting application solutions

Product Lines

5 product lines, including HII-S series cold-chamber DCM (180-5000T), LEAP series cold-chamber DCM (300-5000T), large-tonnage series (over 6000T) and hot chamber DCM (zinc alloy and magnesium alloy series).

Application

Automotive, E-vehicles, Urban mobility, 3C electronics, household appliances, Aerospace, rail transit, motorcycle, etc.

Key statistics

Ranks among the best in Chinese die casting market

TOP 1

The total export sales volume ranks first in China for consecutive years

Involved in the draft of *Cold-chamber DCM* and other national standards

Statistics according to China Customs

Integrated Solutions

Thixomolding solution

Product Line

Thixomolding semi-solid magnesium alloy injection molding machine

Application

3C electronics, digital cameras, laptops, new energy vehicle structural components, structural components of urban mobility, automotive interior applications

Key statistics

The first 1250T Thixomolding machine was delivered to the German client HETTICH

"Servo control semi-solid magnesium alloy high-speed injection molding machine" won 19th China Patent Awards of excellent

"UN650II semi-solid magnesium alloy injection molding machine" won the third prize of Guangdong Science and Technology

Integrated Solutions

Robotic automation system application solutions

Product Series

1. Die casting automation solutions——intelligent die casting cell, die casting robot, grinding workstation
2. Rubber & plastic automation solutions——injection molding automation, rubber injection molding automation
3. General industrial automation solutions——material loading/unloading, casting, welding, stacking
4. Industrial data services —— Yi CMS, Yi MES, data acquisition gateway, marking and tracking systems

Application

Automotive, motorcycle, household appliances, communication, 3C, medical treatment, education, etc.

Key statistics

Innovation

"HPDC Extraction and Inserting Integrated Solution" won the innovation title of die casting industry in 2020

Won the best industry application of The Capek Prize (2018-2019)

Rated as the first batch of leading intelligent manufacturing service agency in Jiangsu province

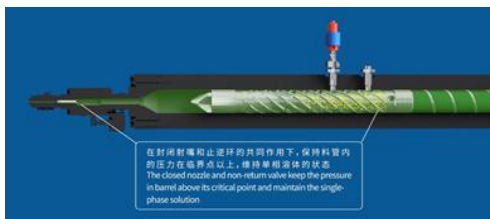

New Tech Customized Solutions

New technology and process customization

FoamPro+DecoPro

Microfoaming injection
molding + decorative surface

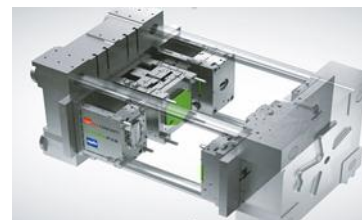

DirectPro

Long fiber direct
injection molding

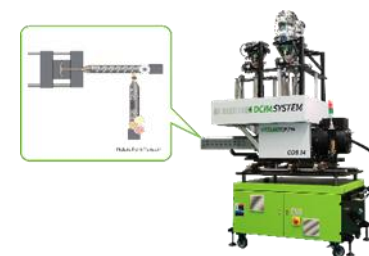

ReactPro

Polyurethane reaction injection
molding integrated solution

DCIM

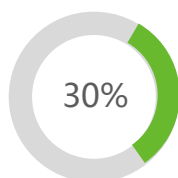

Direct compounding injection
molding solution

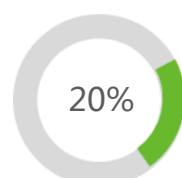

New Tech Customized Solutions

FoamPro + DecoPro Micro-Foaming Injection Molding + Surface Decoration

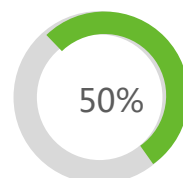

Customer value

30% reduction in product weight

Reduce molding cycle by up to 20%

Reduce clamping force by up to 50%

Reduce shrinkage and warping

Improve dimensional accuracy
Better surface quality

Replacing the traditional two-step process at low cost

Customized material: aluminum foil, wood foil, leather, and fabric, etc.

Application

Automotive industry

Packaging industry

Electrical/
Electronics

Office equipment

Footwear industry (sole)

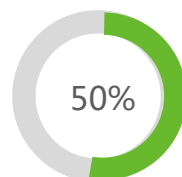

Consumer goods

New Tech Customized Solutions

DirectPro Long fiber direct injection molding

Customer value

Save 50% on DIM raw material cost

Retain over 5mm fiber length in the product

Adjust fiber length and content based on requirement

Application

Automobile Industry
(dashboard frame)

Automobile Industry
(hatch gate frame)

Household appliance
(Washing machine drum)

Building
pallet

Logistics
(packing crate)

Furniture industry;
(theater seats)

New Tech Customized Solutions

ReactPro Polyurethane reaction injection molding integrated solution

Customer value

Superior to traditional spray coating process

- One-step molding, high efficiency
- Improved yield
- Low energy consumption
- Reduced Logistics
- Low investment cost
- Environmentally friendly
- High quality product

Diverse surface design

- Metallic effect
- Piano black
- Matte effect
- scratch-resistant
- 3D depth
- Transparent varnish
- Soft-touch
- Self-healing

Application

Transparent surface coating of trim

Soft-touch surface

Automobile body trim

New Tech Customized Solutions

Direct compounding injection molding solution

Customer value

CO₂ reduction across the whole value chain

Ideal for bio-based and biodegradable polymer processing

Perfect for circular economy and recycling

Reduce production cost and shorten development cycle

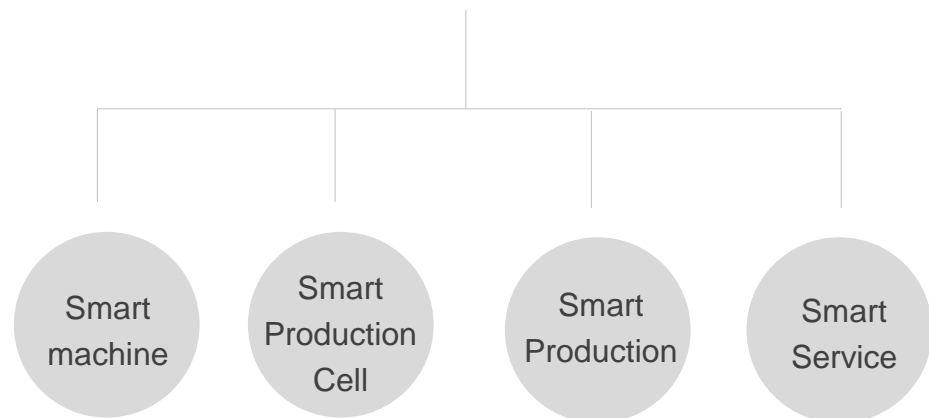

Application

Intelligent Manufacturing Solutions

YIZUMI industrial Internet platform Yi⁺ Platform

Adopts cloud computing, big data, The Internet of Things, 5G and other new generations of ICT technology, providing intelligent manufacturing solutions for effective production

- Foshan Digital Intelligent Demonstration Factory in 2021
- Guangdong 5G+ Industrial Internet Iconic Project in 2021
- Outstanding industrial internet APP solutions selected by MIIT in 2021
- State Information Security Certification Grade Two in 2020
- Enterprise of Industrial Internet Ecological Supply Resource Pool in Guangdong Province in 2019
- Key Enterprise of Strategic Emerging Industry in Guangdong Province in 2018 (Intelligent Manufacturing)

Intelligent Manufacturing Solutions

Smart Production

Condition Monitoring System

Intelligent Execution System

Smart Service

- AR remote diagnosis
- One-click repair
- Remote training
- AR display

PART 4

Customer Service and Responsibility

1 / Industry Application Experience

2 / Global Standardized Services

3 / Corporate Social & Environmental Responsibility

Industry Application Experience

With our extensive experience in advanced molding and casting solutions, we are your reliable partner.

Automotive industry partners (Examples)

Industry Application Experience

Corporate Social Responsibility

Sustainable Development

To facilitate the common progress and development of enterprises, economy, environment and society.

We are committed to reducing material and energy consumption, carbon dioxide emissions and taking other environmental protection measures in the global production process.

We will continuously optimize our equipment to reduce the consumption of resources and environmental impact throughout the product life cycle.

Corporate Social Responsibility

Social welfare

YIZUMI actively participates in social welfare events and invested in the YIZUMI sports park - a public welfare project built based on BOT* model. We fully support the sustainable development of sports, education, wellbeing, culture and other arenas of social responsibility.

(*BOT=Build—Operate—Transfer)

“We will participate in more public affairs and strive to become a ever more well-respected company.”

Thank You

We Walk Alongside The World

YIZUMI
